

Figure 2 is a heatmap showing gene expression levels across different cell types and conditions. The genes analyzed are IGFBP3, JUN, NDRG2, THBS1, APOD, IGFBP5, and ADAMTS1. The cell types are labeled 0 through 7, and the conditions are labeled 0 through 7. The color scale ranges from -3 (blue) to 3 (red), with 0 being white. Marginal heatmaps are provided for both cell type and condition, showing the distribution of cell types and conditions across the genes.
