

Figure 1: Heatmap of gene expression across cell types and conditions. The heatmap shows expression levels for 8 genes (IGFBP3, JUN, NDRG2, THBS1, APOD, IGFBP5, ADAMTS1) across 8 cell types (0\_activated to 7\_resting) and 8 conditions (0\_resting to 7\_resting). A color scale on the right indicates expression levels from -3 (blue) to 3 (red). A legend on the right shows cell type and condition labels.
